

Writing-room and Content Query API

The 10 Fundamentals of Fixing Modern Content Management Problems

About

- Sadek Drobi, Zengularity @sadache
- Playframework co-creator, functional and reactive web programming for Scala and Java
- Co-founder of prismic.io, focusing on solving content problems

The problem: Manageable Content

Developers and designers' nightmare

Content, is everywhere

Websites, Apps, Mobile, TVs, ... etc

Manageable Content, what happens?

Manageable content

- Hardcoded, redeploy on every change? typos?

Manageable content

- Hardcoded, redeploy on every change? typos?
- Use a Content Management System (and abandon your favourite capable technology)

Manageable content

- Hardcoded, redeploy on every change? typos?
- Use a Content Management System (and abandon your favourite capable technology)
- Write your own system from scratch, not as easy as it seems

Why CMSs don't leverage their promise?

- Fundamental Focus Problem

Historical Problems?

- CMSs help you design websites, seriously?
- Today, design mobile apps?
- Develop applications in a CMS?
- Total nonsense!

Designer and developer are full time jobs!

- Pick your favourite technology
- Design trends change every month

Why CMSs don't leverage their promise?

- Fundamental Focus Problem

Why CMSs don't leverage their promise?

- Fundamental focus problem
- Do one thing and do it good

Why CMSs don't leverage their promise?

- Fundamental focus problem
- Do one thing and do it good
- Remember? Content Management!

Decouple Content from Presentation

Manage content, let designers and developers do the presentation

Writing-room and Content Query API

The 10 Fundamentals of Fixing Modern Content Management Problems

Writing-room and Content Query API

- Writing-room to help content writers write and experiment with content ideas
- Powerful Content Query API, enabling developers to run sophisticated queries on their content repositories

Writing-room and Content Query API

The 10 Fundamentals of Fixing Modern Content Management Problems

Structured Content with a comfy text and media editor

Structuring content is the key, but it should not turn into bloated forms to fill
