Reliable or unreliable

@anne_e_currie
@containersoluti

A photograph featuring two action figures standing in a miniature city environment. On the left is a figure of a woman with short blonde hair, wearing a white jumpsuit with a red utility belt and holding a black handgun. On the right is a figure of a man with dark hair, wearing a long brown trench coat and holding a small, glowing object. The background includes a white car, green trees, and a building with a clock tower under a blue sky. The text "Talk Fast!" is centered in the image.

Talk Fast!

Life doesn't contain a lot of coincidences

Distributed systems do

“If you eliminate the impossible,
whatever remains,
however
improbable,
must be the solution”

Mr Spock (& Sherlock Holmes)

@anne_e_currie
@containersoluti

Traffic->coincidence

Coincidence->improbable distributed systems failures

@anne_e_currie

Chaos Engineering -> Improbable Distributed System Failures
